About us

Ninestar, Your Technology-oriented Partner

Ninestar Image Int'l.,Ltd is the world s largest manufacturer of imaging consumables with technological superiorities. Established in 2000, Ninestar has created a legend and became one of the fastest growing companies in this industry based on the consistency in developing proprietary technology.

Headquartered in Zhuhai China, Ninestar operates one of the largest manufacturing plants that are up to more than 110 thousand square meters with the whole staff more than 3500 people. Ninestar develops, manufactures and sells a full line of quality compatible and remanufactured inkjets and laser printer consumables, refill kits, drum units, bulk inks, photo papers and so on, which add up to over 1000 different categories. All the products are manufactured under stringent quality management systems and adopt the latest technology in accordance with ISO 9001 and ISO 14001 standards to ensure excellent product quality.

As the market leader in inkjet industry, Ninestar invests heavily into research and development, intellectual property, customer support and worldwide distribution network to serve the global customers with quality products and quality service. A strength of six overseas subsidiaries and numerous distribution partners enables Ninestar to penetrate markets of over 70 countries and regions providing customers the opportunity to achieve and maintain dominant market positions.

In the future, Ninestar will remain focused on our core competencies that revolve around fully proprietary technology, environment friendly products, top service and user friendliness, with an aim to continue as a strong and innovative global brand for compatible printer supplies.

NINESTAR

2010 Inkjet Product Catalogue

Ninestar has been fortunate to win many accolades over the past years, which are really a true demonstration of our commitment to the customers all over the world and our contribution to the remanufacturing industry.

We are very proud to be nominated as the Quality Leader for Inkjet in Recharger Magazine s Readers Choice Awards 2008. At Ninestar, quality is always the top priority. We are also pleased to be recognized as No. 5 in Recycler Magazine s First Fifty for the remanufacturing industry in 2007.

We believe it is our consistency in innovation, technology, intellectual property, and professional customer service that has lead us to a great success and brought us ahead of competition

▲ Famous Brand Product By Bureau of Quality and Technology Supervision of Guangdong Province (2006)

▲ Fastest Growing Foreign Invested Company By Zhuhai Government (2006)

▲ Named No. 5 in Recycler First Fifty 2007

NINESTAR

2010 Inkjet Product Catalogue

Clearly the technology leader in inkjet industry, Ninestar holds a strong R&D team with over 300 engineers and cooperates with worldwide well-known academies and research institutions, promising the leading position. Ninestar also made huge investment into the testing facilities and advanced technologies to ensure the optimum product quality and fast new product release.

With the technology superiority, Ninestar is always committed to research and development of up-to-date chip technology and ink technology, which are the two biggest challenges for the aftermarket industry to catch up with OEMs. We are proud that Ninestar was the first in the aftermarket around the globe to develop the chip for inkjet cartridges in 2001. Now the sales volume of Ninestar s chips take over 70% of global compatible chip market. Ninestar also develops a wide range of inkjet ink from desktop inkjet printers to large format printers over 200 models. The EverBrite durable pigment ink launched in 2007 rivals performance of OEM inks in various areas including the color gamut, fade resistance, water fastness, smudge and highlighter resistance, intercolor bleeding, durability etc.

Dedicated to the research of proprietary technologies, Ninestar has grown to own the most patents among the aftermarket players with over three hundreds of patents both domestically and internationally. Every year, the company spends over 1.5 million US dollars in patents application and maintenance. Meanwhile, Ninestar IP team co-operates with the top-class overseas patent attorneys to provide customers IP solutions and ensure the products' uniqueness.

The speed of Ninestar s new product development is widely recognized by the industry. Ninestar is one of the only few imaging supplies manufacturers that own the capability to design, develop, and manufacture every one of its new products in-house, which accelerates our new product development speed, adds more competition strength for our products overall costs and allows us the speed and flexibility to respond to any challenges.

- **Jul. 2001**, Ninestar released the chipped compatible Epson Ink cartridge T017/T018, being number 1 in the world to release the chipped cartridge in the aftermarket industry.
- **Mar. 2002**, Ninestar being the first all over the world launched the innovative sponge free ink cartridge
- **Apr. 2004**, Ninestar successfully applied the micro-pressure theory to compatible Canon ink cartridge
- **Oct. 2006**, Ninestar launched new products for Epson 9 electrode printers, leading the global aftermarket for 6 months.
- **Nov. 2007**, Ninestar launched EverBrite Durable Pigment Ink which achieved breakthrough pigment ink performance that can match and even exceed the original.
- **Apr. 2008**, Ninestar released series Canon PGI-5 & CLI-8 Chipped Ink cartridges, with unique innovative design and in-house advanced chip technology development.

NINESTAR

2010 Inkjet
Product Catalogue

Ninestar believes quality products originate from strict raw materials and rigorous production process control. All the products are manufactured under the rigorous implementation of ISO 9001 global quality system and ISO 14001 global environmental systems.

To ensure every inkjet cartridge s quality and consistency, Ninestar implements extensive testing procedures: pre-qualification of materials, receiving inspection, inspection status identification of material throughout the manufacturing process and on-line testing of semi-manufactured cartridges. After completion, the cartridges will be subject to complete visual inspection of 100% of the product, and post-production test of finished products for the product life, function and print quality.

As the key component of inkjet cartridges, every ink is tested before approved for cartridge-specific use. The QA team performs various ink tests including, but not limited to: Basic parameter testing, Continuity, Density, Compatibility, Print Contrast, Brightness, Waterproof, UV and ozone proof and so on. Ninestar is one of the pioneer to focus on developing high quality ink that works as well as the OEMs, or even better than OEMs.

Ninestar's strict sense of quality control extends not just to production, but also the care and efficiency of packaging and shipping. These supporting services have quality assurance system in place to meet the stringent quality standards.

Ninestar believes outstanding product quality also comes from excellent management. Every Ninestar People is the contributor of the quality.

Outsourcing has been a hot option for the US and European remanufacturers. Either small & medium-sized or large remanufacturers, they are outsourcing from the most reputed manufacturers to lower the costs and increase the product competitiveness.

Ninestar is committed to provide one-stop outsourcing solutions for our customers:

Timely and regular new products alerts help our customers to understand the market needs.

In-house private labeling service offers our customers value-added packaging solutions from design to printing. We meet your every single need.

First-to-market products, together with our global warehousing and logistic network help our customers to seize more marketing opportunities and reduce the inventory costs.

Proven outsourcing alliances with the industry s most reputable and rigorous remanufacturers.

Reputed Outsourcing Solution Provider ■
